

## Trade Support Programme 2 (TSP 2)

### Overall Objective

The Overall Objective of the EU-Indonesia Trade Support Programme 2 is to facilitate a further integration of Indonesia into the international trade system.

### Project Purpose

The Project Purpose is to upgrade the quality infrastructure that supports Indonesia's access to international markets.

The export quality infrastructure system comprises export quality management and control, standardisation, inspections and certification, rapid alert systems and market surveillance.

### Implementation details

The programme will start implementation in 2009. The Ministry of Trade will be responsible for the implementation of the programme and will coordinate the activities of other involved agencies such as: Ministry of Industry, Ministry of Marine Affairs and Fisheries, Ministry of Agriculture, Indonesian Standardisation Agency, Indonesian Accreditation Agency, Indonesian Food and Drugs Agency.

The European Commission contribution to the programme will amount to € 15 million. Participating agencies will provide in-kind contribution equivalent to € 900,000.

### Expected results

- Improved Government capacity to formulate and implement trade policy related to export quality infrastructure
- Strengthened standardisation and accreditation agencies, recognised internationally
- Upgraded export quality control and testing institutions, collaborating with international counterparts
- Better understanding and knowledge about international standards and quality requirements by Indonesian SMEs
- Improved export capabilities of SMEs, leading to increased exports in selected sectors.
