

# EU Partnership for Peace Programme

## ***EU's position on the Middle East Peace Process***

The achievement of lasting peace in the Middle East is a central aim of the EU, whose main objective is: a two-State solution leading to a final and comprehensive settlement of the Israeli-Palestinian conflict based on implementation of the [Road Map](#), with Israel and a democratic, viable, peaceful and sovereign Palestinian State living side-by-side within secure and recognised borders enjoying normal relations with their neighbours in accordance with UN Security Council Resolutions 242, 338, 1397, 1402, and 1515 and on the principles of the Madrid Conference.

This includes:

- a fair solution to the complex issue of Jerusalem and a just, viable, realistic and agreed solution to the problem of Palestinian refugees.
- a solution in the Israeli-Syrian and Israeli-Lebanese tracks.

The EU sees a need to address political, economic, humanitarian and security issues simultaneously, wherever necessary via negotiations between the Parties. It recognises that continued and comprehensive Palestinian reforms are necessary and national reconciliation is a basic step to move forward the solution of the conflict. On the other hand, the EU calls the freezing of settlement activities and dismantling of settlement outposts and Israeli abstention from measures which are not in accordance with international law, including extra-judicial killings and collective punishment.

The EU unreservedly condemns terrorism, violence or incitement, which cannot be allowed to hold the peace process or stability in the region hostage. Terrorist attacks against Israel have no justification whatsoever and the EU has included Hamas, Islamic Jihad and other armed Palestinian groups in its list of banned terrorist organisations. The EU recognises Israel's right to protect its citizens from these attacks, but emphasizes that the Israeli Government, in exercising this right, should act within international law and takes no action that aggravates the humanitarian and economic situation of the Palestinians. The assumption of full control of security by the PA in areas under its authority is a key test for the Palestinian Authority and the EU urges it to show determination in the fight against extremist violence and to confront individuals and groups conducting and planning terrorist attacks
