

Technical Assistance for the implementation of the legal and regulatory framework in the Aviation Sector according to the Agreement on Common Aviation Area between the EU and The Republic of Moldova

Communiqué on the latest activities performed by the EU team of civil aviation experts

The EU funded Technical Assistance Project for Civil Aviation delivered a series of activities and a workshop in February 2015 in Chisinau, supported by the team of European experts in such areas as Air Traffic Management, Aviation Security and Aviation Safety.

The overall objective of these activities is to provide support to different levels of local authorities and aviation institutions in order to transpose the EU legal framework into the national legislation of Moldova as well as to adapt local standards to European and to strengthen personnel capabilities by application of modern tools.

The main goals were as follows:

- assist Moldovan aviation authorities in implementing the EU rules in air traffic control according to the Agreement on Common Aviation Area and Single European Sky
- improvement of the security plan, checks and quality control in civil aviation

As a result of these missions a great interest was shown from the beneficiaries of the Project which developed into a fruitful cooperation.

The performance of such missions and the output of the Technical Assistance Project will improve Moldova's experience in traffic control, security, safety, market access and aviation competition and quality of services.

A Project implemented by the NTU Consortium with the financial support of the European Union
