Global Tech Panel

The #GlobalTechPanel brings together leaders from the tech industry, the world of investment, and civil society. The aim of the Global Tech Panel is to foster new types of cooperation between diplomacy and technology to address challenges and threats but also to make innovation a true force for good in an increasingly more complex and connected world.

About the Global Tech Panel

Launched by the former EU High Representative Federica Mogherini, the Global Tech Panel is a forum for the open discussion and practical development of innovative solutions; it focuses specifically on the nexus between tech and common foreign and security policy. The ambition is to build a common understanding of the opportunities and challenges of the digital age, presenting practical suggestions
to be shared with policy-makers at top level, all around the world. It also seeks to develop and coordinate concrete initiatives that the EU, tech companies, other tech stakeholders and partners can implement in coalition.

International Security and Lethal Autonomous Weapons

Exploring how Artificial Intelligence can deliver for human advancement and international peace is a key pillar of the work of the Global Tech Panel. A top and hot priority is to help develop and implement the principles of ethical and responsible innovation to govern the development of technologies used in weapons systems, and to ensure accountability and compliance with international law.

Digital for Development
The EU and its Member States are the world’s leading providers of development assistance – including in the field of connectivity. The Global Tech Panel, chaired by former EU High Representative Federica Mogherini and bringing together leaders from the tech industry, the world of investment, and civil society, is working to combine the Panel members' insights, influence, networks and resources for concrete projects to advance human development and harnessing tech for all.
