

Achmad Zaki Ramadhan

Cilegon, Banten

 @mjck

Occupation:

International Relations
Undergraduate Student at
Universitas Padjadjaran

Currently active in the following organisations:

President of Student Energy at
Universitas Padjadjaran

Deputy Director of Capacity
Development and Competitions at
Ikatan Alumni Tim Olimpiade Geografi Indonesia (Alumni
Association of Indonesia
Geography Olympiad Team)

Active volunteer at Greenpeace
Indonesia Chapter Bandung

Growing up in the industrial city of Cilegon, Zaki sees humanity and the environment as inseparable entities. The environmental damages and lack of multistakeholder action to address this issue has shaped his vision of a community-based, green-oriented, and inclusive cooperation based on a penta-helix approach to influence the creation of public policies that are transparent and fair for all parties.

An international relations student at Universitas Padjadjaran in Bandung, Zaki is currently active in numerous organisations with an emphasis on the environment. He is the President of Student Energy at Universitas Padjadjaran, Deputy Director of Capacity Development and Competitions at Ikatan Alumni Tim Olimpiade Geografi Indonesia (IA-TOGI), and Staff of Regional Division Chapter Indonesia at ASEAN Youth organisation. In addition his engagement in various organisations, Zaki was selected as the Delegate of Indonesia at the Conference of Youth 18 2023 in Dubai, UAE, a global-scale environmental youth summit hosted by the United Nations Framework Convention on Climate Change (UNFCCC) and was a bronze medalist at the National Science Competition in Geography 2021, an official competition under the Ministry of Education, Culture, Research, and Technology.

In the Youth Sounding Board programme, Zaki strives to become an advocate and advisor of environmental issues in Indonesia. He plans to utilise his experiences in research and grassroots work on climate-related activities to strengthen Indonesia-EU diplomacy as well as accelerating Indonesia's transition to green economy and energy through various concrete initiatives. One of Zaki's planned initiatives is to establish an inclusive platform for all Indonesian youths to freely voice their opinions in the environmental field.
