

La Ode Syahdan Aditya

West Side Seram, Maluku

 [@syahdan_adityaode](https://www.instagram.com/syahdan_adityaode)

Occupation:

Bachelor of Science, Chemistry
Department, Universitas Halu Oleo

**Currently active as the
CEO of SLINS Indonesia**

La Ode Syahdan Aditya is committed to a career in the social sector, focusing on implementing sustainable development goals in the energy field. As the founder of SLINS Indonesia in Maluku, a fledgling startup with a focus on improving the quality of life for communities through sustainable programmes, he aims to improve community quality of life through sustainable programmes. Since 2021, SLINS has raised environmental awareness among youth and, in 2022, partnered with PT. Astra International to educate villagers in Wawosunggu Village, Southeast Sulawesi, about solar power. Over the next five years, La Ode plans to collaborate with various stakeholders to develop geothermal power plants in Maluku and advocate for energy transitions in the nickel industry.

La Ode has participated in various leadership programmes driven by a passion for leadership, youth, and European Union relations, leveraging five years of experience in these areas. The programme presents an opportunity to deepen his knowledge on global topics and enhance the movement's international reach. His objectives include representing Eastern Indonesian youth in discussions on EU external actions, ensuring youth involvement in EU representation programmes, creating youth-focused climate change initiatives through Indonesia-EU cooperation, and networking with youth representatives to promote active participation in EU delegation programmes.
