> ESSENTIAL SUPPORT TO COUNTRIES

IN THE
SHORT-TERM,
THE PROJECT
WILL HELP:

Train health workers and responders in
detecting and treating affected patients.

Communicate public health guidance and
measures rapidly, regularly and transparently,
to help avoid infection and prevent the spread.

Scale up capacity to test
for COVID-19.

Procure essential supplies such as
masks, gloves and protective wear for
both the treatment of COVID-19 patients
and frontline responders.

Improve prevention, preparation for,
detection and response to public health
emergencies.

Improve the tracking and
reporting of the virus.

Ensure the continuity of
essential health services.

IN THE
LONGER-TERM,
THE PROJECT
WILL HELP:

Strengthen countries' public
health emergency
preparedness, coordination,
detection and response; and
build the resilience of
national health systems.

Project is implemented by the WHO
Regional Office for Europe and WHO
country offices, in close coordination
with EU Delegations, national
authorities and development
partners.

ABOUT THE REGIONAL PROJECT

- A joint effort of the European Union (EU) and WHO Regional Office for Europe, focusing on Kazakhstan, Kyrgyzstan and Turkmenistan.
- A 2-year, €3 million regional project to help prevent, detect and respond to the COVID-19 pandemic, and increase country capacities to respond to similar public health threats.
