

EU-CHINA FOOD, AGRICULTURE AND BIOTECHNOLOGY (FAB) FLAGSHIP INITIATIVE

A COMPREHENSIVE RESEARCH AND INNOVATION COOPERATION PROGRAMME TO TACKLE SUSTAINABLE AGRICULTURE, FOOD SECURITY AND SAFETY IN THE EU AND CHINA

**Priority Areas of mutual interest for EU China research and innovation collaboration
Jointly identified and agreed by European and Chinese policy makers and experts**

- 1. Food related issues:** food safety, and quality, food processing, logistics, inspection and controls, traceability, sustainable consumption, food waste;
- 2. Sustainable agriculture:** integrated pest management, organic and low-input farming, crop variety development, water and soil management, animal health and welfare, sustainable livestock breeding and production, urban agriculture;
- 3. Biotechnologies:** new bio products, biomass sources and standards;

FAB FLAGSHIP WORK PROGRAMME 2014-2015

The EU China research and innovation flagship initiative on food, agriculture and biotechnologies (FAB) is a comprehensive research and innovation cooperation programme to tackle sustainable agriculture, food security and safety in the EU and China. A first phase implemented through the Horizon 2020 work programme 2014/2015 included seven topics in areas of common interest, which resulted in ten projects with European and Chinese participants.

FLAGSHIP PROJECTS WORK PROGRAMME 2014-2015

EUCLID

EU-CHINA Lever for IPM
Demonstration

www.euclidipm.org

LANDMARK

LAND Management: Assessment,
Research, Knowledge base

www.landmark2020.eu

SAPHIR

Strengthening Animal Production
and Health through the Immune
Response

www.h2020-saphir.eu

REFRESH

Resource Efficient Food and dRink
for the Entire Supply cHain

www.eu-refresh.org

ISQAPER

Interactive Soil Quality Assessment
in Europe and China for Agricultural
Productivity and Environmental
Resilience

www.isqaper-project.eu

FEED-A-GENE

Adapting the feed, the animal and
the feeding techniques to improve
the efficiency and sustainability of
monogastric livestock production
systems

www.feed-a-gene.eu

MyToolBox

Food and Feed through an
Integrated Tool Box for Mycotoxin
Management

<https://www.mytoolbox.eu/>

MycKey

Integrated and innovative key
actions for mycotoxin management
in the food and feed chain

<http://www.mycKey.eu/>

Agrocycle

Sustainable techno-economic
solutions for agricultural value
chain

<http://www.agrocycle.eu/>

NoAW

Innovative approaches to turn
agricultural waste into ecological
and economic assets

<http://noaw2020.eu/>

FAB FLAGSHIP WORK PROGRAMME 2016-2017

The second phase of the FAB Flagship in Work Programme 2016-2017 covered five topics identified and drafted together for the first time ever within the EU-China FAB Task Force. The calls resulted in five projects.

PROJECTS/TOPICS IN WORK PROGRAMME 2016-2017

EU-China-Safe

Delivering an Effective, Resilient
and Sustainable EU-China Food
Safety Partnership

www.euchinasafe.eu

EUCLEG

Breeding forage and grain
legumes to increase EU's and
China's protein self-sufficiency

<http://www.eucleg.eu/>

SiEUGreen

Sino-European innovative green
and smart cities

<https://www.nmbu.no/en/projects/sieugreen>

HealthyLivestock

Tackling Antimicrobial Resistance
through improved livestock Health
and Welfare

SHui

Soil Hydrology research platform
underpinning innovation to manage
water scarcity in European and
Chinese cropping systems

FAB FLAGSHIP WORK PROGRAMME 2018-2020

For third phase of the FAB Flagship in Work Programme 2018-2020, a more balanced EU-China cooperation is envisaged with emphasis on integrated approaches to food safety in agri-food chain, high-efficient management of soil quality and land resources, healthy soils for healthy food production, and use of biogas digestate for high-quality organic fertilisers, fertilisers and other topics with common interests when it is appropriate. Four topics are planned to be published.

HORIZON 2020 WORK PROGRAMME 2018-2020

SFS-37-2019:
**Integrated approaches to
food safety controls
across the agri-food
chain**

SFS-38-2018:
**Highly efficient
management of soil
quality and land
resources**

CE-SFS-39-2019:
**High-quality organic
fertilisers from biogas
digestate**

SFS-40-2020:
**Healthy soils for healthy
food production**

HORIZON 2020 – EU-CHINA CO-FUNDING MECHANISM (CFM)

The China-EU co-funding mechanism on research and innovation (CFM) cooperation has played a significant role in supporting win-win cooperation since its launch in December 2015. The European Commission and Chinese Ministry of Science and Technology (MOST) agreed the renewal of the CFM for the period 2018-2020 to support joint projects between European and Chinese universities, research institutions and companies. Under CFM the Chinese Ministry of Science and Technology (MOST) will provide financial support on a competitive basis to China-based entities that will participate in joint projects with European partners under Horizon 2020. For the period 2018-2020, MOST intends to reserve an annual budget of up to 200 Million RMB, and the EC intends to reserve a budget of up to 100 Million Euro in Horizon 2020 calls targeting cooperation with China. FAB is among the CFM priorities. China-based participants in projects selected under Horizon 2020 are invited to apply for co-funding from MOST.

THE EU-CHINA FAB FLAGSHIP INITIATIVE

BACKGROUND INFORMATION

Being the two biggest food producers in the world, China and the EU, share a common goal to join forces for addressing challenges related to food security, food safety, healthy diets, animal health and sustainable agriculture. Research and innovation cooperation in Food, Agriculture and Bio-technology (FAB) can make a major contribution to these important common and global challenges.

The EU China Task Force on Food, Agriculture and Biotechnologies was created in 2011 as thematic working group under the Joint Steering Committee for EU China S&T Cooperation. The EU-China FAB Flagship Initiative on Food, Agriculture and Biotechnologies was officially launched at the EU-China Summit on 21 November 2013 with the signature of a Letter of Intent on Research and Innovation Cooperation in FAB between the European Commission and the Chinese Academy of Agricultural Sciences (CAAS). Through extended discussions among experts from both sides at the EU-China Experts' seminars on R&I cooperation on FAB and the EU-China FAB Task Force meetings, mutually beneficial objectives and areas of common interests are identified.

It is in the interest of the European Union (EU) to ensure that China is moving towards more sustainable agro-food production systems, as unsustainability in China might have severe knock-on effects in an increasingly globalised market. The opportunity to export new advanced sustainable technologies and scale-up the potential of the Chinese market will enhance innovation in Europe and contribute to growth and jobs. Ensuring sustainable food production systems in China will also increase global trade predictability, overall productivity, transparency of the food chain and resource-efficiency.
