

Isfana water project

Implementing organisation(s)	<i>European Bank for Reconstruction and Development</i>
Location	<i>Kyrgyzstan, Isfana city</i>
Keywords	<i>Water infrastructure, sustainability, Kyrgyzstan</i>

Program Development Objective

The Isfana water project aims at improving the availability, reliability and quality of municipal infrastructure. Also, it focuses on the commercialization of water supply and sanitation in order to ensure operational and financial sustainability once the project is completed.

A total of 5,19 million euros were invested to address the infrastructure and rehabilitation needs in the water sector in Isfana

Beneficiaries

4,600 people are currently serviced by the water companies; their number is predicted to increase to 10,000 after the project implementation.

Project's activities:

- Water intakes, storage and treatment
- Water distribution networks and service connections
- Metering operation
- Maintenance equipment

Location

Expected outcomes

- The number of people with access to affordable, drinking tap water will increase from 4,600 to 10,000;
- Implementation of new or rehabilitated water supply pipes and sewage system;
- Reduction of water production
- Reduction of CO2
- Reduction of water borne diseases.
- Environmental and Social Action Plan (ESAP) is implemented;
