

Naryn water project

Implementing organisation(s)	<i>European Bank for Reconstruction and Development</i>
Location	<i>Kyrgyzstan, Naryn city</i>
Keywords	<i>Water infrastructure, sustainability, Kyrgyzstan</i>

Program Development Objective

The Naryn water project aims at improving the availability, reliability and quality of municipal infrastructure. Also, it focuses on the commercialization of water supply and sanitation in order to ensure operational and financial sustainability once the project is completed.

A total of 6,68 million euros were invested to address the infrastructure and rehabilitation needs in the water sector in Naryn.

Beneficiaries

10,000 people are currently serviced by the water companies; their number is predicted to increase to 20,000 after the project implementation.

Project's activities:

- Extension of the main sewer network
- Construction of a new waste water treatment plan
- Metering operation
- Maintenance equipment

Location

Expected outcomes

- The number of people with access to affordable, drinking tap water will increase from 10,000 to 20,000;
- Implementation of new or rehabilitated water supply pipes and sewage system;
- Reduction of water production
- Reduction of CO2
- Reduction of water borne diseases.
- Environmental and Social Action Plan (ESAP) is implemented;
