

Talas water project

Implementing organisation(s)	<i>European Bank for Reconstruction and Development</i>
Location	<i>Kyrgyzstan, Talas region</i>
Keywords	<i>Water infrastructure, sustainability, Kyrgyzstan</i>

Program Development Objective

The Talas water project aims at improving the availability, reliability and quality of municipal infrastructure in Talas region. Also, it focuses on the commercialization of water supply and sanitation in order to ensure operational and financial sustainability once the project is completed.

A total of 5, 2 million euros were invested to address the infrastructure and rehabilitation needs in the water sector in Talas region

Beneficiaries

12,643 people are currently serviced by the water companies; their number is predicted to increase to 21,300 after the project implementation

Project's activities:

- Improving critical water supply
- Improving wastewater management
- Rehabilitating networks
- Metering operation

- Maintenance equipment

Location

Expected outcomes

- The number of people with access to affordable, drinking tap water will increase from 12,643 to 21,300;
- Implementation of an individual metering system for each household and of a metering based billing;
- Reduction in CO2 derived from lowering of water losses at system level.
