

Tokmok water project

Implementing organisation(s)	<i>European Bank for Reconstruction and Development</i>
Location	<i>Kyrgyzstan, Tokmok region</i>
Keywords	<i>Water infrastructure, sustainability, Kyrgyzstan</i>

Program Development Objective

The European Union providing support to the City of Tokmok to rehabilitate water supply services and selected wastewater improvements in the City. Investments are expected to significantly improve access to clean water, reduce water losses, improve resilience to climate change and optimise operating costs for the Tokmok Water Company.

A total of 5, 1 million euros were invested to address the infrastructure and rehabilitation needs in the water sector in Tokmok.

Beneficiaries

The quality of service is predicted to improve and serve 32,000 people after the project implementation.

Project's activities:

- Improving critical water supply
- Improving wastewater management
- Rehabilitating networks
- Metering operation

- Maintenance equipment

Location

Expected outcomes

- The quality of service is predicted to improve and serve 32,000 people after the project implementation.
- Implementation of an individual metering system for each household and of a metering based billing;
- Reduction of CO2 derived from reduction in water losses at system level.
