and Nuclear Safety

Context

The MobiliseYourCity Partnership, under the auspices of the Ministry of Housing and Urban Development of Cameroon (MINHDU), is organising the 3rd **MobiliseYourCity Africa Mobility Conference from 17-19 September 2019 in Yaoundé, Cameroon.**

The African continent has among the highest urbanization rates in the world. To meet the needs of African urban citizens, Partner countries and cities of MobiliseYourCity are developing ambitious mobility plans that will see these countries and cities leapfrog to affordable and clean mobility solutions.

Following the first two MobiliseYourCity Africa Mobility Conferences organized in Agadir in 2017 and Abidjan in 2018, pioneering cities have gained tremendous experience as they graduate from the preparation of SUMP's to the implementation phase while new cities continue to join the MobiliseYourCity Partnership.

The MobiliseYourCity Africa Mobility Conference 2019 will enable experienced mobility practitioners to deepen their knowledge on digital technologies, greening urban freight, urban mobility GHG emission calculation and reporting, as well as effective participatory approaches, and introduce new members of the MobiliseYourCity community of practice to the principles and practices of Sustainable Urban Mobility Plans (SUMP's). It will also celebrate the official presentation of the SUMP's of Douala and Yaoundé, as well as the work done at national level in Cameroon. The conference is targeted towards national and local governments, private sector, civil society, and development partners in the fields of mobility, urban development, land use planning and project finance. The Conference is an important milestone on the road to Africa-France Summit scheduled for June 2020, which will focus on sustainable cities.

MobiliseYourCity Partners from **19 cities and 7 countries in Africa and 15 globally active Institutional and Knowledge Partners** will attend the conference.

The third MobiliseYourCity Africa Mobility Conference will be the first MobiliseYourCity conference to offer two streams of sessions to accommodate the interests of both experienced practitioners and representatives of cities who are just beginning their SUMP journeys.

Specifically, the conference aims to:

- Empower the Africa MobiliseYourCity community of practice to share challenges, solutions and paths to success
- Enable collective learning through technical sessions delivered by international experts
- Enrich the MobiliseYourCity methodological framework based on experience gained by the practitioners
- Initiate MobiliseYourCity's contribution to the Africa-France Summit 2020
