

Maili Suu water project

Implementing organisation(s)	<i>European Bank for Reconstruction and Development</i>
Location	<i>Kyrgyzstan, Maili Suu city</i>
Keywords	<i>Water infrastructure, sustainability, Kyrgyzstan</i>

- Rehabilitating of water networks
- Installation of metering operation
- Maintenance equipment

Location

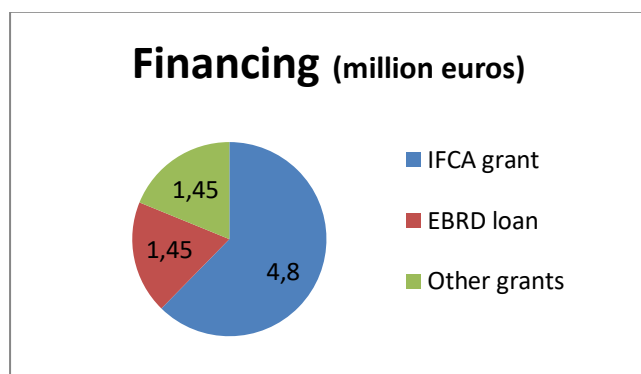

Program Development Objective

The European Union is providing support to the City of Maili Suu to rehabilitate water supply services and selected wastewater improvements in the City. Investments are expected to significantly improve infrastructure in the water system, reduce water losses, and optimise operating costs for the Maili Suu Water Company.

Expected outcomes

- The number of people with access to affordable, drinking tap water will be 17,640;
- Implementation of an individual metering system for each household and of a metering based billing;
- Reduction of CO2 derived from reduction in water losses at system level.

A total of 7,7 million euros were invested to address the infrastructure and rehabilitation needs in the water sector in Maili Suu.

Beneficiaries

A number of 17,640 persons are expected to benefit from water services after the project implementation.

Project's activities:

- Improving basic water infrastructure and access to services for the population
- Improving resilience to climate change
- Eliminate health risks posed by unreliable water supply and unsanitary wastewater handling
